Wireless N USB Adapter doesn't work

2019/08/27

I use a wireless connection USB from TP-Link on my desktop, but it doesn't work and it has never worked. I have the best connection, but when I actually try to use the internet, a yellow triangle shows up in front of the connection icon and it says that there's 'no internet access.' Some time later it'll disappear again, but then when I try to use the internet again the same thing happens. All my other devices have internet. My mom even uses the same TP-Link USB on her desktop and it works just fine. I've already tried to reboot the router and tried to redo the whole installation on the USB adapter.

## are cell phone signal jammers legal
